GROWLIGHT

The growlights are microcosms complete with their own suns. Water does need to be applied to maintain maximum health. The lights are especially suited for tropicals, epiphytes, fresh herbs, and succulents. A swath of whipped glass clouds the bulb and diffuses the light. Hand blown and shaped in lead free crystal. No molds are used, and each glass shape is unique. Designed and made by Siemon & Salazar in California. Signed.

GROWLIGHT PENDANT

Included candelabra base light assembly
canopy and up to 2’ of pipe or
chain link
base planting medium
with planting instructions
