SMALL THICK LIGHTS

These small thick crystal pieces focus on the way glass forms and light play with each other. Whipped glass clouds the bulb on the bubble lights, while hand rendered texture creates unique projected patterns on the urchin and barnacle lights. These low voltage fixtures can be hung singularly from a monopoint canopy or as a grouping for a statement piece. Hand blown and shaped in lead free crystal. No molds are used, and each glass shape is unique. Designed and made by Siemon & Salazar in California. Signed.
